

# Mouse pad with 4 port USB 2.0 hub

## General information

This mouse pad is equipped with a 4 port USB2.0 hub. The hub is fully 1.1 backwards compatible. When the hub is connected, the surrounding of the mouse pad will light up. Especially in the dark this gives a nice effect. The biggest advantage of this combination is that you don't have to search for a USB port behind a computer anymore. It's at your desk already.
